

**Demonstration of energy efficiency and
utilisation of renewable energy sources through public buildings**

PRESENTATION of the PROJECT

Uroš Vajgl, Head of Environment and Climate Change Division

REPUBLIC OF SLOVENIA
MINISTRY OF AGRICULTURE AND THE ENVIRONMENT

This project is implemented through the CENTRAL EUROPE Programme co-financed by the ERDF.

TABLE OF CONTENTS

About the project

Project Aims

- Certification procedure
- Sample buildings
- Transnational network

Activities in Slovenia

About the project

Partnership, timeframe, budget, overall objective

- ❑ **Partnership:** 12 partners, 8 Central European countries
 - 7 demonstration buildings in 7 countries
 - 3 partners from Slovenia (PRCO, GI ZRMK, MKO)

- ❑ **Project Duration : 10/2011 – 12/2014**
 - prolonged for 3 months

- ❑ **Budget: € 4.466.084 in total**
 - ERDF funds: EUR 3.609.749,40

- ❑ **Overall objective:**

Supporting the Use of Renewable Energy Sources and Increasing Energy Efficiency through application demonstration in public buildings

Project Aims

4 main aims to support the overall objective

- 1. Implementation of a certification procedure:**
certification procedure for ecological and energy-efficient building in the public sector in order to achieve a model for public buildings to increase the demand for zero energy buildings on a large scale
- 2. Set up sample buildings, establishing a show case:**
with transnational coordination and joint developed criteria 7 demonstration buildings for communication and promotion of energy-efficient building in the public and private sector.
- 3. Ensure accessibility to exemplary buildings:**
The consortium aims to enable wide access to pattern buildings to illustrate the benefits of ecological building.
- 4. Establishing a transnational network:**
to develop the ecological quality of constructions by offering certification services in the public sector. The network will ensure that a continuous development and dissemination takes place.

Activities in Slovenia

Carried out by the Ministry...

❑ **Local workshops:** civil engineering experts discussing sustainable construction, energy renovation of (public) buildings and green public procurement

- three-day expert (invitation-only) workshops were held on February 4, 5 and 6
- expert support for the transformation process for environmental requirements of green public procurement of buildings (in Slovenia regulated by a bylaw)

❑ Brochure on Energy Efficiency in Public buildings

❑ Booklet presenting Good practice Examples

❑ Transnational Conference
