- started collaborating with Red noses
- joined different projects (Eno, Mavričniki. . .)

leaflet on sustainable development

OSNOVNA ŠOLA DAVORINA JENKA
CERKLJE NA GORENJSKEM

Sobota, 29. marec 2008
DAN ŠOLE
VZGOJA ZA TRAJNOSTNI RAZVOJ

Razvoj, ki zadovoljuje potrebe sedanjih generacij, ne da bi ogrozil možnosti prihodnjih generacij, da bodo tudi te lahko zadovoljevale svoje potrebe, je trajnostni razvoj.

Brundlandova komisija, 1987

Spoštovani starši!

Vabimo vas, da se v soboto, 29. marca, udeležite odprtih učnih ur, kjer bodo učenci pokazali svoje znanje in prizadevanja za trajnostni razvoj, ter se jim pridružite pri čiščenju šolskega okolisa.

8.00 – 9.35	Dejavnosti za trajnostni razvoj po razredih Šolski parlament
9.35 – 9.50	Malica
9.50 – 12.30	V sodelovanju z občino očiščevalna akcija na terenu po načrtu za vsak razred (v primeru lepega vremena) Prireditve v športni dvorani za učence in starše (v primeru dežja)

Dejavnosti bodo potekale v matičnih učilnicah vsakega razreda. V primeru slabega vremena bo namesto očiščevalne akcije na program prireditve v športni dvorani.

V učilnici nad športno dvorano bo v času odprtih ur od 8.00 do 9.35 potekal šolski parlament, kjer bodo sodelovali predstavniki šolske skupnosti, šolskega radia in nekaj predstavnikov meteorološkega krožka. Gostja na parlamentu bo dr. Lučka Kajfež Bogataj, ki je lani kot članica Mednarodnega foruma za podnebne spremembe skupaj z Alom Gorom prejela Nobelovo nagrado za mir. Na parlament ste poleg staršev sodelujočih otrok vabljeni tudi starši, ki bi vas tudi zanimal pogovor z omenjeno strokovnjakinjo.

Vabljeni!

Nameravam se udeležiti predstavitve v ____ razredu.

We think about food.....because
they can't think without it.

- children's choices influenced by habit and by social, cultural, peer and parental influence;
- raising awareness about the importance of consuming healthy food and drink;
- worked on the consumption of food at school by,
 - by improving the eating environment;

the quality of the eating experience,

service style.

- **Presentations and tasting** of healthy food and drink have been carried out by our head cook for more than ten years in the lower grades
- Home economics classes in higher grades
- After school classes

school year 2009/10

Decided to **modify** our food procurement
practice
promotion of organic food

Planned different activities:

- thematic class hours carried out in the whole school
- weekly school radio programmes

- **notice boards** put up in different places around the school, especially in the canteen with information about organic food
- information in the **local paper**
- information on both the school's and municipal **web page**
- **education** about organic food also for parents and members of the local community

Development of the
Countryside

BIO SNACK and BREAKFAST

Once a month we offer our children school bio

- Snacks and breakfast
(spelt rolls, oatmeal bread, tangerines, yoghurt)

What to do to improve our practice

- The setting of whole school policy within the framework of becoming a sustainable school
 - detailed action plan
 - emphasis on raising awareness about raising about the importance of eating organic food and not on cost-saving and on responding to children's choices

- Find ways :
 - how to carry out a review of our current contracts;
 - for different options if we decide to make a change;
- more attention and professional expertise when preparing invitations to tenders

overcoming barriers

- procurement of organic food should be a political decision;
- great commitment from the leaders in the educational sector;
- systematic organisational support from the government;
- strategic plan for the procurement of organic food for all educational institutions – schools
- guidelines for educational institutions on how to best procure organic food;

- Electronic purchasing system
- eCatalogues for goods and services
- subsidies for schools and kindergartens when procuring organic food
- institutional cooperation among different schools and their leading staffs when preparing tenders

Network of schools

- work together with suppliers across the cluster to negotiate better deals and meet minimum order levels, and source a range of local food.

- activities supporting small and local food producers to create regional or sub-regional groups that would be invited to bid to supply school food
