First Announcement: International Conference

How to Achieve Energy Efficiency in Public Buildings

Green public procurement and integration into sustainable criteria for building assessment

13th March 2014 from 9am to 4 pm, Halls 3 and 4 -Urška,
53th international fair DOM / HOME, Exhibition and Convention Centre,
Dunajska cesta 18, Ljubljana, Slovenia

Low-energy construction and renovation (energy rehabilitation) of buildings in the public sector while respecting the principles of sustainable construction can contribute significantly to achieving the goal of reaching 20 % improvement of energy efficiency by 2020. Interested professional are invited to participate in this free International Conference where a number of concrete ideas and solutions to how public buildings can set an example in the field of energy rehabilitation, mainly by defining the methods and systems for sustainable assessment of buildings will be presented and discussed.

The event is **free of charge**, but we kindly ask you to confirm your attendance **by March 6 2014**. To register [click here](#). Additional information: Iva Gruden, iva@umanotera.org, +386 1 43 97 100
