# Javna in skupnostna tovorna kolesa

# Why should you car2go?

## Missed the bus?

Get going right away - without waiting in the heat or rain. Sometimes it's nice to ride solo.

## A second (or only) car

Fun fact: over 50% of car2go members don't own a car - but if you do, we're here when your car is in the shop, or if you share one car in your household.

## Don't pay for parking

Park downtown for free - without having to remember to feed the meter.

## No need to plan ahead

car2go is like having a backup plan without the plan. Grab one and go - and see where your journey takes you.

# Življenje brez avtomobila?

Brought to you by the good folks at: **GoBanking Rates**

## Cost of Automobile Ownership

According to AAA, the average cost to operate and own your vehicle is 70.7 cents a mile which totals a whopping \$5,925 annual average (if the car is driven 10,000 miles annually).

The main components that contribute to the real costs of owning your car are: (The following numbers are all annual averages)

Average Cost of Owning a Car  
(including decreased depreciation)

**\$5,925**

**\$567 = 9.17%**  
LICENSE, REGISTRATION AND TAXES

\$567 annual average

**\$1,009 = 16.33%**  
FUEL COSTS

(based on average gas cost of \$2.30 per gallon)  
Fuel expenses total nearly one quarter of the total costs of car ownership. Regardless of the initial sticker price, over time, a gas consuming SUV will cost significantly more to own and operate than a gas "sipper."

**\$2,318 = 37.49%**  
VALUE DEPRECIATION

Although the low sticker prices of a Kia or a Hyundai may look like a steal, over the long haul those vehicles have lower resale values than cars such as Hondas or Toyotas. According to Consumer Reports, after five years of car ownership and weighing the depreciation of the vehicles, Hyundais are not proven to be less expensive with comparable Honda's models.

**-\$257**  
DECREASED DEPRECIATION

by miles driven.

This number differs from "value depreciation." It is based on the annual wear and tear of your vehicle determined

**\$456 = 7.38%**  
MAINTENANCE AND REPAIR

your car, but for the safety and well being of passengers.

Making sure your vehicle is maintained per the instructions of the owner's manual is not only imperative for the life span of your car, but for the safety and well being of passengers.

**\$77 = 1.25%**  
TIRES

the standard ones included on your vehicle.

Even the most careful driver can accidentally drive over a nail. The average costs of tires is based on replacing the standard ones included on your vehicle.

**\$976 = 15.78%**  
AUTO INSURANCE

fluctuate accordingly.

Insurance rates vary according to your vehicle, car owner's age, driving history and location of registration and will fluctuate accordingly.

**\$779 = 12.60%**  
FINANCING CHARGES

your personal credit history.

Ultimately what interest rate you are charged for financing your vehicle purchase works in direct correlation to your personal credit history.
