

Our food system is unsustainable and susceptible to economic and climate shocks which we are already experiencing and which are expected to become even more dire in the future. Without substantial and efficient measures, rising food prices can become a constant, further worsened by the ongoing climate crisis.

Umanotera, The Slovenian Foundation for Sustainable Development invites you to an online round table

Climate crisis and rising food prices - how to solve two problems at the same time?

**Monday, September 26 2022
11 AM to 12.40 PM CET
ZOOM**

What are the key vulnerability factors and especially which are the changes at both the consumer and systemic level that are needed in order to ensure quality, safe and accessible food while reducing the impact on climate change?

This will be discussed by the following experts:

- Janez Potočnik, PhD (UNEP International Resource Panel)
- Matjaž Turinek, PhD (Organic farming Zlate misli)
- Breda Kutin (Slovene Consumers' Association)
- Andreja Sušnik, PhD (Slovenian Environment Agency)
- Aleš Kuhar, PhD (Biotechnical Faculty, University of Ljubljana)
- Senka Šifkovič (Umanotera)

The round table will be moderated by Maja Prijatelj Videmšek.

MANDATORY REGISTRATION

The participation at the event is free of charge. Translation will be provided. For additional information, contact Nika Tavčar at 01 439 4890, nika@umanotera.org or visit www.umanotera.org.
